

Specialist competencies

FACE-TO-FACE (KE-FI)

Framework for Resource Efficiency in Industry

Training for policy and industry leaders

PARTICIPANTS

This course is intended for GIZ staff and external customers, i.e. policy makers in the areas environment, economy, climate change, representatives from industrial associations, unions, NGOs and other relevant stakeholders of developing and emerging economies.

OBJECTIVES AND CONTENT

This training will enable you to develop Resource Efficiency (RE) strategies and to draft and implement RE programs, which contribute to the Paris Declaration and Sustainable Development Goals. The training modules can be adapted to relevant sectors and different framework conditions.

Course content:

- Best environmental practices, policy tools and technical instruments to develop and achieve RE
- Systems and organisations - insights into existing national RE programmes of other countries
- Objectives and instruments to develop an RE programme
- Strategy for the mid-term implementation of an RE programme

METHODS

- Presentations
- Participative working groups
